## **Activities in termination in DNA replication**

- Proofreading
- Filling gap

## **Enzymes needed for proof reading new helix in termination in DNA replication**

- Exo nuclease

## **Magnitude of probability of error in DNA replication**

1 in 100000

## **Enzyme needed for filling gap created by excised bases**

DNA polymerase

## **Function of exonuclease in termination in DNA replication**

Proofreading

## **Function of DNA polymerase in termination in DNA replication**

Filling gap created by excised bases
