List of activities for spending energy in photon in einstein's photo electric equation	2
Expression of energy of photon with respect to kinetic energy	2
Expression of work function of photon with respect to energy of photon	2
Derivation for expression of einstein's photo electric equation in terms of difference in frequencies	2
Expression of einstein's photo electric equation in terms of difference in frequencies	2
Derivation of einstein's photo electric equation in terms of difference in wavelength	2
Expression of einstein's photo electric equation in terms of difference in wavelength	3
Expression of einstein's photo electric equation in terms of stopping potential .	3

List of activities for spending energy in photon in einstein's photo electric equation

- Eject of electron from metal surface
- Provide kinetic energy to the ejected electron

Expression of energy of photon with respect to kinetic energy

$$E = hf = \phi_0 + \frac{1}{2}mv_m^2$$

Expression of work function of photon with respect to energy of photon

$$\phi_0 = hf_0$$

Derivation for expression of einstein's photo electric equation in terms of difference in frequencies

•

$$hf = hf_0 + \frac{1}{2}mv_m^2$$

•

$$hf - hf_0 = \frac{1}{2}mv_m^2$$

•

$$h(f - f_0) = \frac{1}{2}mv_m^2$$

Expression of einstein's photo electric equation in terms of difference in frequencies

$$h(f - f_0) = \frac{1}{2}mv_m^2$$

Derivation of einstein's photo electric equation in terms of difference in wavelength

•

$$h(f - f_0) = \frac{1}{2}mv_m^2$$

•

$$f = \frac{c}{\lambda}$$

•

$$h\left(\frac{c}{\lambda} - \frac{c}{\lambda_0}\right) = \frac{1}{2}mv_m^2$$

•

$$hc\left(\frac{1}{\lambda} - \frac{1}{\lambda_0}\right) = \frac{1}{2}mv_m^2$$

Expression of einstein's photo electric equation in terms of difference in wavelength

•

$$hc\left(\frac{1}{\lambda} - \frac{1}{\lambda_0}\right) = \frac{1}{2}mv_m^2$$

Expression of einstein's photo electric equation in terms of stopping potential

•

$$hc\left(\frac{1}{\lambda} - \frac{1}{\lambda_0}\right) = eV_0$$
